UX Treatment 2

App Launches and brings a welcome screen

User is given option to select crisis or emergency

Emergency

User is connected to emergency service

In this method, the user is given the option to call emergency straight from the start because in case of a life threatening emergency, users may not have the time to fill a survey.

Crisis

User Survey appears and user interacts

User fills out survey related to their mental health

User is given results based off their response

No

User is given option to call now if crisis,

Yes

User is connected to emergency service

User is placed on watchlist for emergencies

User submits form and waits for contact

User is taken to a form

Get Counseling

User is taken to a help section with additional resources
